<b>Nominator's statement</b>	On behalf of the Canadian institute of Geomatics and Canada's Surveying, Mapping and Geomatics Community I, Robert Parkinson, President of the Canadian Institute of Geomatics would like to nominate Daniel Roberge for the function of Chair Elect Commission 7
Why the association wants to nominate Nominee	<p>Canada and CIG are giving an increasing priority to links with leading global professional and knowledge based organizations. The exchange of best practices, the development of next practices and the integration of national and international networks is of strategic significance to our organization, our members, our businesses and our economy. Commission 7 is of special strategic interest to us and Daniel Roberge has a strong personal and professional interest in FIG and particularly Commission 7 in which he has played an active role in the last years.</p> <p>Mr. Roberge's experience and his active involvement in many large-scale land surveying and geomatics initiatives have him well positioned to take on these roles. He has been recognized as a leader in the design, development and implementation of the Reform of the Québec Cadastre and is currently the Director of the of General Surveyor's Office with the Ministry of Natural Resources of Quebec.</p> <p>I have observed Daniel as a strong leader and innovator in his job, in his community of surveyors and internationally and he is one of the best Canada has to offer. He combines an unusual professional capability with significant senior management and leadership abilities so critical to facilitate and lead an important Commission.</p> <p>His multi-lingual capabilities (French, English and Spanish) and his international network provides effective tools to break down some of the barriers to full participation from all continents.</p> <p>Daniel is an action oriented person, a team player and leader and as the recent GeoConference Quebec 2007 has shown, results are impressive.</p>
Support the Association can offer the Nominee (financial and other)	His nomination is supported not just by CIG, but by his employer the Québec Department of Natural Resources and Wildlife (in which his office as Surveyor General of Québec is located), the Québec and Canada's other National Land Survey organizations, including Natural Resources Canada and the Department of Foreign Affairs and International Trade. Support and financing for his role can be drawing from multiple organizations. In addition the CIG Executive and administrative services will be available to him during

	his tenure
