| Georeferenced Software: InfanView | | |
| Remarks The State Archive in Przemysl has 175 maps sheets in the format 200 dpi (A1) | | |

10. International Projects

| |
|---|
| Do you require a support by local or international initiatives? No |
| Are you interested in a common initiative of the cadastral archives? Yes |
| Please give us some ideas! Between 1997-1999 took place three conferences in the State Archive in Przemysl regarding cadastral documents form XIX century which are holding in polish and ukrainian state archives. I these conferences participeted representatives of State Archive in: Przemysl, Katowice, Krakow, Rzeszow, Lwow, Tarnopol and Ivano-Frankocsk. During this conferences was made database "MAPY KATASTRALNE". This database contains infomration from archive in Przemysl, Katowice and Rzeszow. The rest of archives did not fill in it. Database "MAPY KATASTRALNE" is stored in State Archvie in Przemysl. At the end of the work registration it was planing to publish in two volumes a catalouge, but it has not done. One would think about continuation this project including archives from other countries. |
| Are you interested in an general publication in the Austrian magazine of surveying and geoinformation? No |
| Remarks |

Thank you very much!
