

## The Private Sector & It's Response to change

\* A system for the mobility of Professionals within Europe.

EUROPEAN GROUP OF SURVEYORS

- *The Private sector has for many years been able to carry out professional functions within Europe.*
- *This could only be done by forming an association with a company already established in the host nation.*
- *Individual professionals qualification from another country were not recognised unless they had passed the host nations examinations.*

- *The EU promoted the free movement of persons, services and goods within the Union.*
- *This has meant that Member States are required to adopt procedures to allow individuals to move and work throughout the European Union.*
- *However, the process of recognition of the individuals' qualifications proved more difficult to determine between Member States.*

- *For several years the EU Commission has worked with governments and interested parties in establishing a way forward.*
- *Architects have their own EU directive.*
- *Surveyors and allied professions are contained in a general directive which is non-specific for the remaining professions under taken.*

- *The EU Commission worked over a number of years with Member State Governments, Professions and Organisations to establish how professional qualifications could be recognised.*
- *One of the systems identified is the Professional card or EPC.*
- *This to EGoS is not new but an idea that was developed back in 1996.*

**\* EurGeo ELECTRONIC  
PROFESSIONAL CARD  
FOR SURVEYORS**

## Background

- *EGoS created the EurGeo passport system for Surveyors in 1996, which was based upon the EU's First General Directive Rome Agreement 1968.*
- *Over 200 passports were issued but there were problems.*
- *At that stage there was still a demand by original passport holders for renewal.*

EUROPEAN GROUP OF  
SURVEYORS

- *The problem with the original EurGeo passport scheme was that the majority of Member States were unable to recognise it and therefore the majority of Members of EGoS were unable to sign-up to the scheme.*

- *The scheme was held in abeyance.*

EUROPEAN GROUP OF  
SURVEYORS

- 
- *In 2001 the passport was re-addressed and a proposal for the passport to be made available as an electronic system was considered.*
  - *Although this was considered by the members to be preferable the majority of members were still unable to support the system and work on promoting the system ceased.*

- 
- *In more recent times the EU Commission has pressed the Professions to develop their own process for recognition of Professional Qualifications.*
  - *The EU Commission, published the General Directive for Professional qualifications 2005/36/EC followed by a number of amendments.*

- *Engineers had produced a professional registration card for use by structural engineers that had been used for a number of years and this had been recognised by some Engineering Organisations in 30 countries including European Member states and known as Eurlng*

- *The “Professional card” system, therefore, has been identified by the EU in their recent studies published in December 2011 & more recently October 2013, as an acceptable vehicle to register the individual and their professional qualifications and their ability.*

- 
- *It is the responsibility of European Organisations, such as EGoS, to develop a system for the recognition of professionally qualified Surveyors.*
  - *EGoS considers it is reasonable to adapt the existing EurGeo passport system into an electronic Professional card for use by all Surveyors.*

- 
- *It is also necessary for other organisations, such as FIG, to support and promote the professional card and making it available to as many EU member countries as possible.*
  - *The EU has arranged through the member state governments for professional organisations to register their system and for any additional “top-up” course.*

### Registering;

- *Name and personal details*
- *Professional surveyor's qualifications.*
- *Employment history & Experience*
- *Registration to Surveying Professional Institution, Government body or Chamber.*

### Responsibility of Operating Members;

- *To confirm the applicants details are correct.*
- *Inform the EGoS registrar*
- *To provide additional training for Migrant Surveyors in order to allow the migrant surveyor to provide the opportunity to become a member of the profession in the host State.*

### **EurGeo Registration.**

- *Provided a central registration system.*
- *Provide an EurGeo identity card*
- *Keep “on line” for member organisations, up-to-date access details of the professionals education and work experience and an up-date process*
- *Provide an appeal system.*

### **Listing card holders on internet;**

- *Education, training & experience available to interest parties*
- *Information provided has been authorised by the card holders professional body .*
- *Web site search engines will be able to identify location, job description and competence.*
- *Provides publicity for card holder*

### Details of Career

1. Career from end of full time education to the present date Page 5

Employer & type of business	From	To	Appointments held
Details of your present main occupation and duties performed			
Are you engaged in any other occupation or business? If so/give details			

### AREAS OF COMPETENCE Page 6

1. Hydrography	✓
2. Geodesy	
3. Astronomy & Space	
4. Mathematics and science	
5. Instruments	
6. a. Mining surveying	
b. Civil engineering surveying	
c. Building/Engineering surveying	
7. Building design	
8. Construction technology	
9. Construction economics	
10. Construction quantities	
11. Cost control	
12. Valuation	

13. Finance, Insurance and taxation
14. Marketing/Real Estate
15. Urbanisation/town planning
16. Land and farm management
17. Rural development
18. Project management
19. Construction law
20. Asset management
21. Mineral development
22. Maps & Cartography
23. Construction health and safety
24. Insurance evaluation
25. Environmental and Sustainability
26. Computer Skills
27. Historical and Listed Buildings
28. Other subject (please state)

**DESCRIPTION OF YOUR COMPETENT SKILLS AS LISTED ABOVE**

Please describe, in the following boxes under each skill set that you have confirmed above, a description of the work involved in that skill and the period of time it has been under-taken and state if it is still current.
