

NOAA's National Geodetic Survey's Efforts and Opportunities in the Field of Training and Education

Casey BRENNAN and Erika WILSON, United States

Keywords: Capacity building, Professional practice

SUMMARY

NOAA's National Geodetic Survey's Efforts and Opportunities in the Field of Training and Education: In light of NGS's new direction as articulated in our Ten Year Plan, we are putting an increasing amount of effort into being "trainers" rather than "do-ers" when it come to the field of surveying.

This presentation will focus on a variety of NGS's educational efforts, including: • Educational efforts in cooperation with the National Science Teachers Association (NSTA) targeting primary school science teachers that focuses on using Geodesy and GPS to teach science NGS's new training center at Corbin Virginia The NGS workshop program This presentation will provide attendees with an overview of some of the existing training opportunities already being offered by NGS, and will open a dialog with users about what kinds of additional training opportunities might be appropriate for the community.
