Digital Aerial Mapping

XXV International Federation of Surveyors
Congress, Kuala Lumpur, Malaysia, 16 – 21
June 2014

Digital Aerial Mapping

- Flying 6 major cities at 10cm resolution
- The entire state at 25cm resolution
- Production of orthophoto maps and 1m contour lines
- Images to help in setting up a rural cadastral system, regional development plan of the state, assist in sustainable planning

NAGIS

- Develop a spatial data infrastructure for the state
- To serve as a center for geospatial data that will guarantee easy access to information
- Capability to generate property titles
- Generate massive revenue to the state
- Ensure proper land titling for most or all land holders
- Computerized land administration in a robust GIS environment.

Before the NDP

- Total or Near collapse of land administration infrastructure in the state
- Unplanned settlements and absence of development control activities
- Lack of reliable cadastral maps, untrained survey personnel, lack of modern survey equipment e.t.c.

The Result So far....

- Digital Aerial Mapping
 - Flying of the entire State Completed in December 2013
 - Images processed and now embedded in the NAGIS data base
 - Line & Land cover maps produce for the state
 - Images in use for roof top count of existing buildings & properties
