

Presented at the FIG Working Week 2017,  
May 29 - June 2, 2017 in Helsinki, Finland

# The Swedish National Geodata Strategy

2016–2020

# Some facts about Lantmäteriet

- ❑ National Mapping, Cadaster and Land Registration
- ❑ Top ranked in terms of public confidence (#2 in 2016)
- ❑ User financed by almost 70 %
- ❑ National coordination role in the geodata area
- ❑ Supported by a Public sector Geodata Council

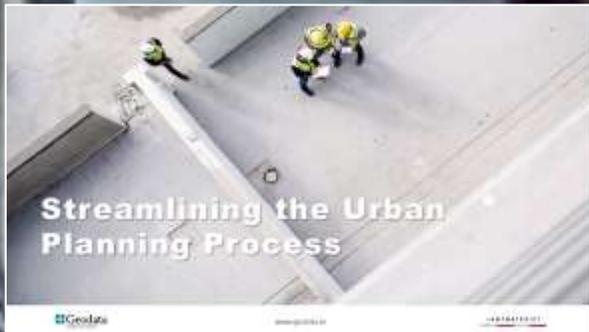

On behalf of the Government Lantmäteriet 2016 prepared a new national geodata strategy in cooperation with the 13 public sector organizations represented in the Geodata Council

The work with the  
new national geodata  
strategy was much  
about how to make a  
strategy come alive

2016–2020

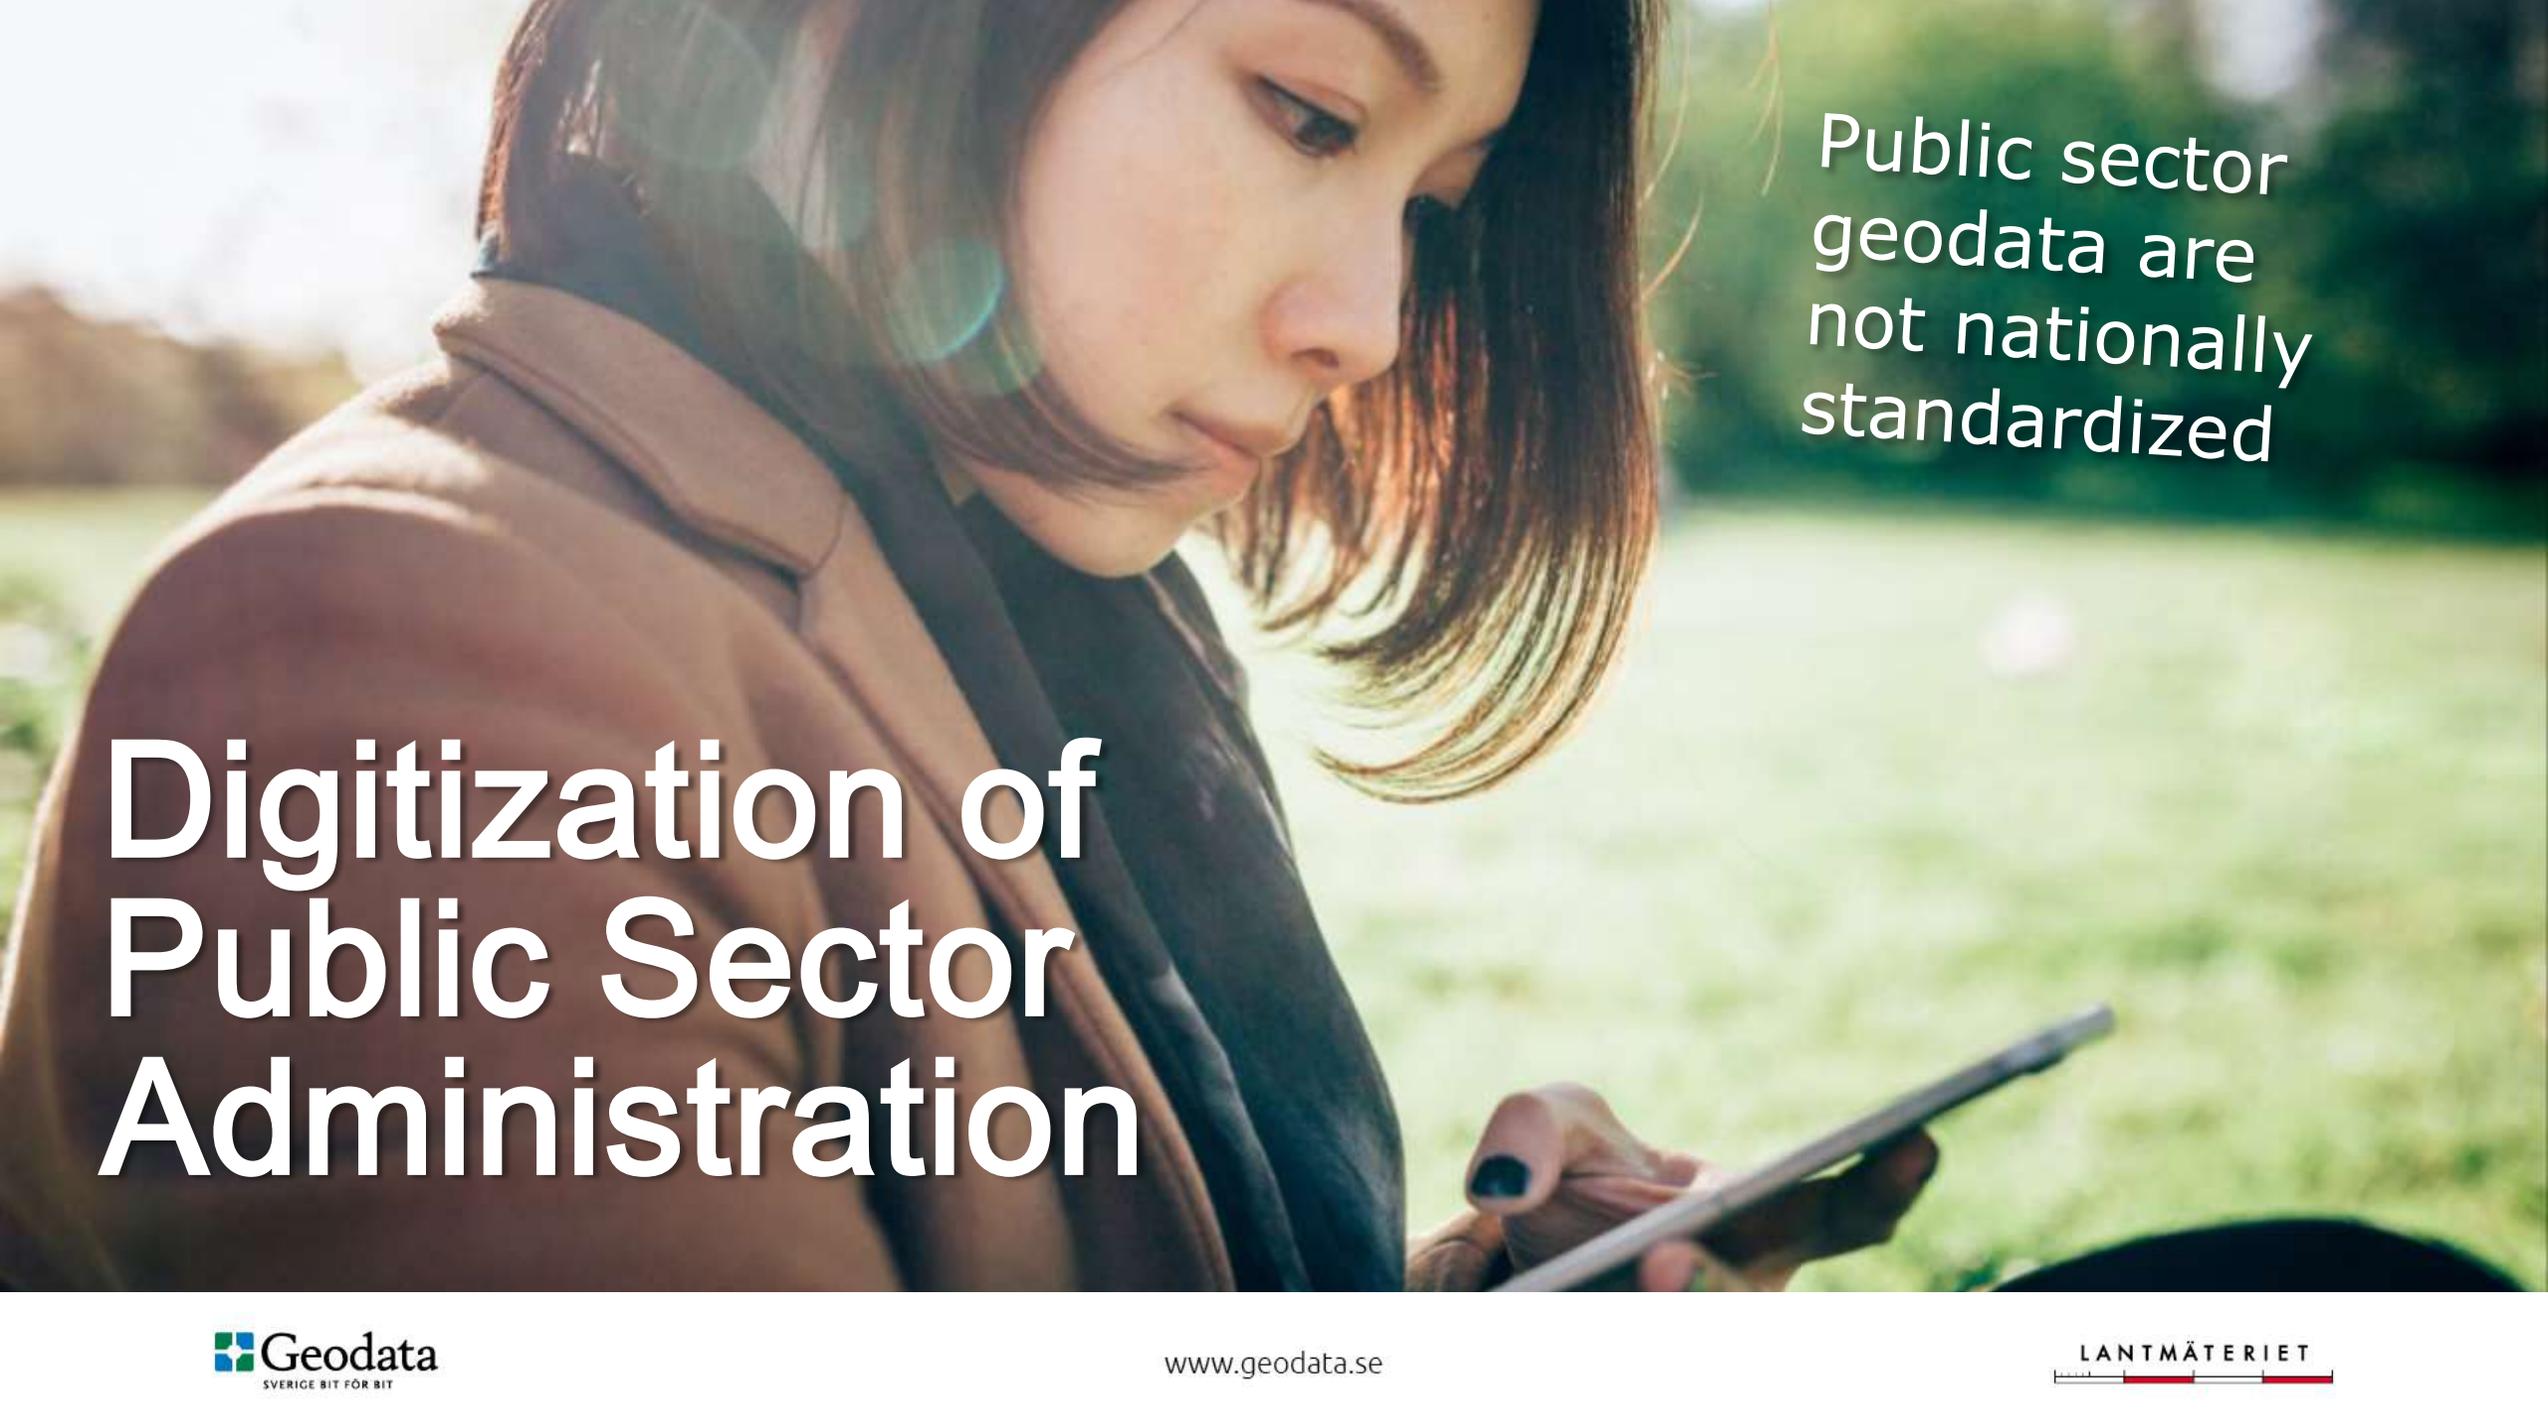

# Five Societal Challenges where Geodata can Contribute

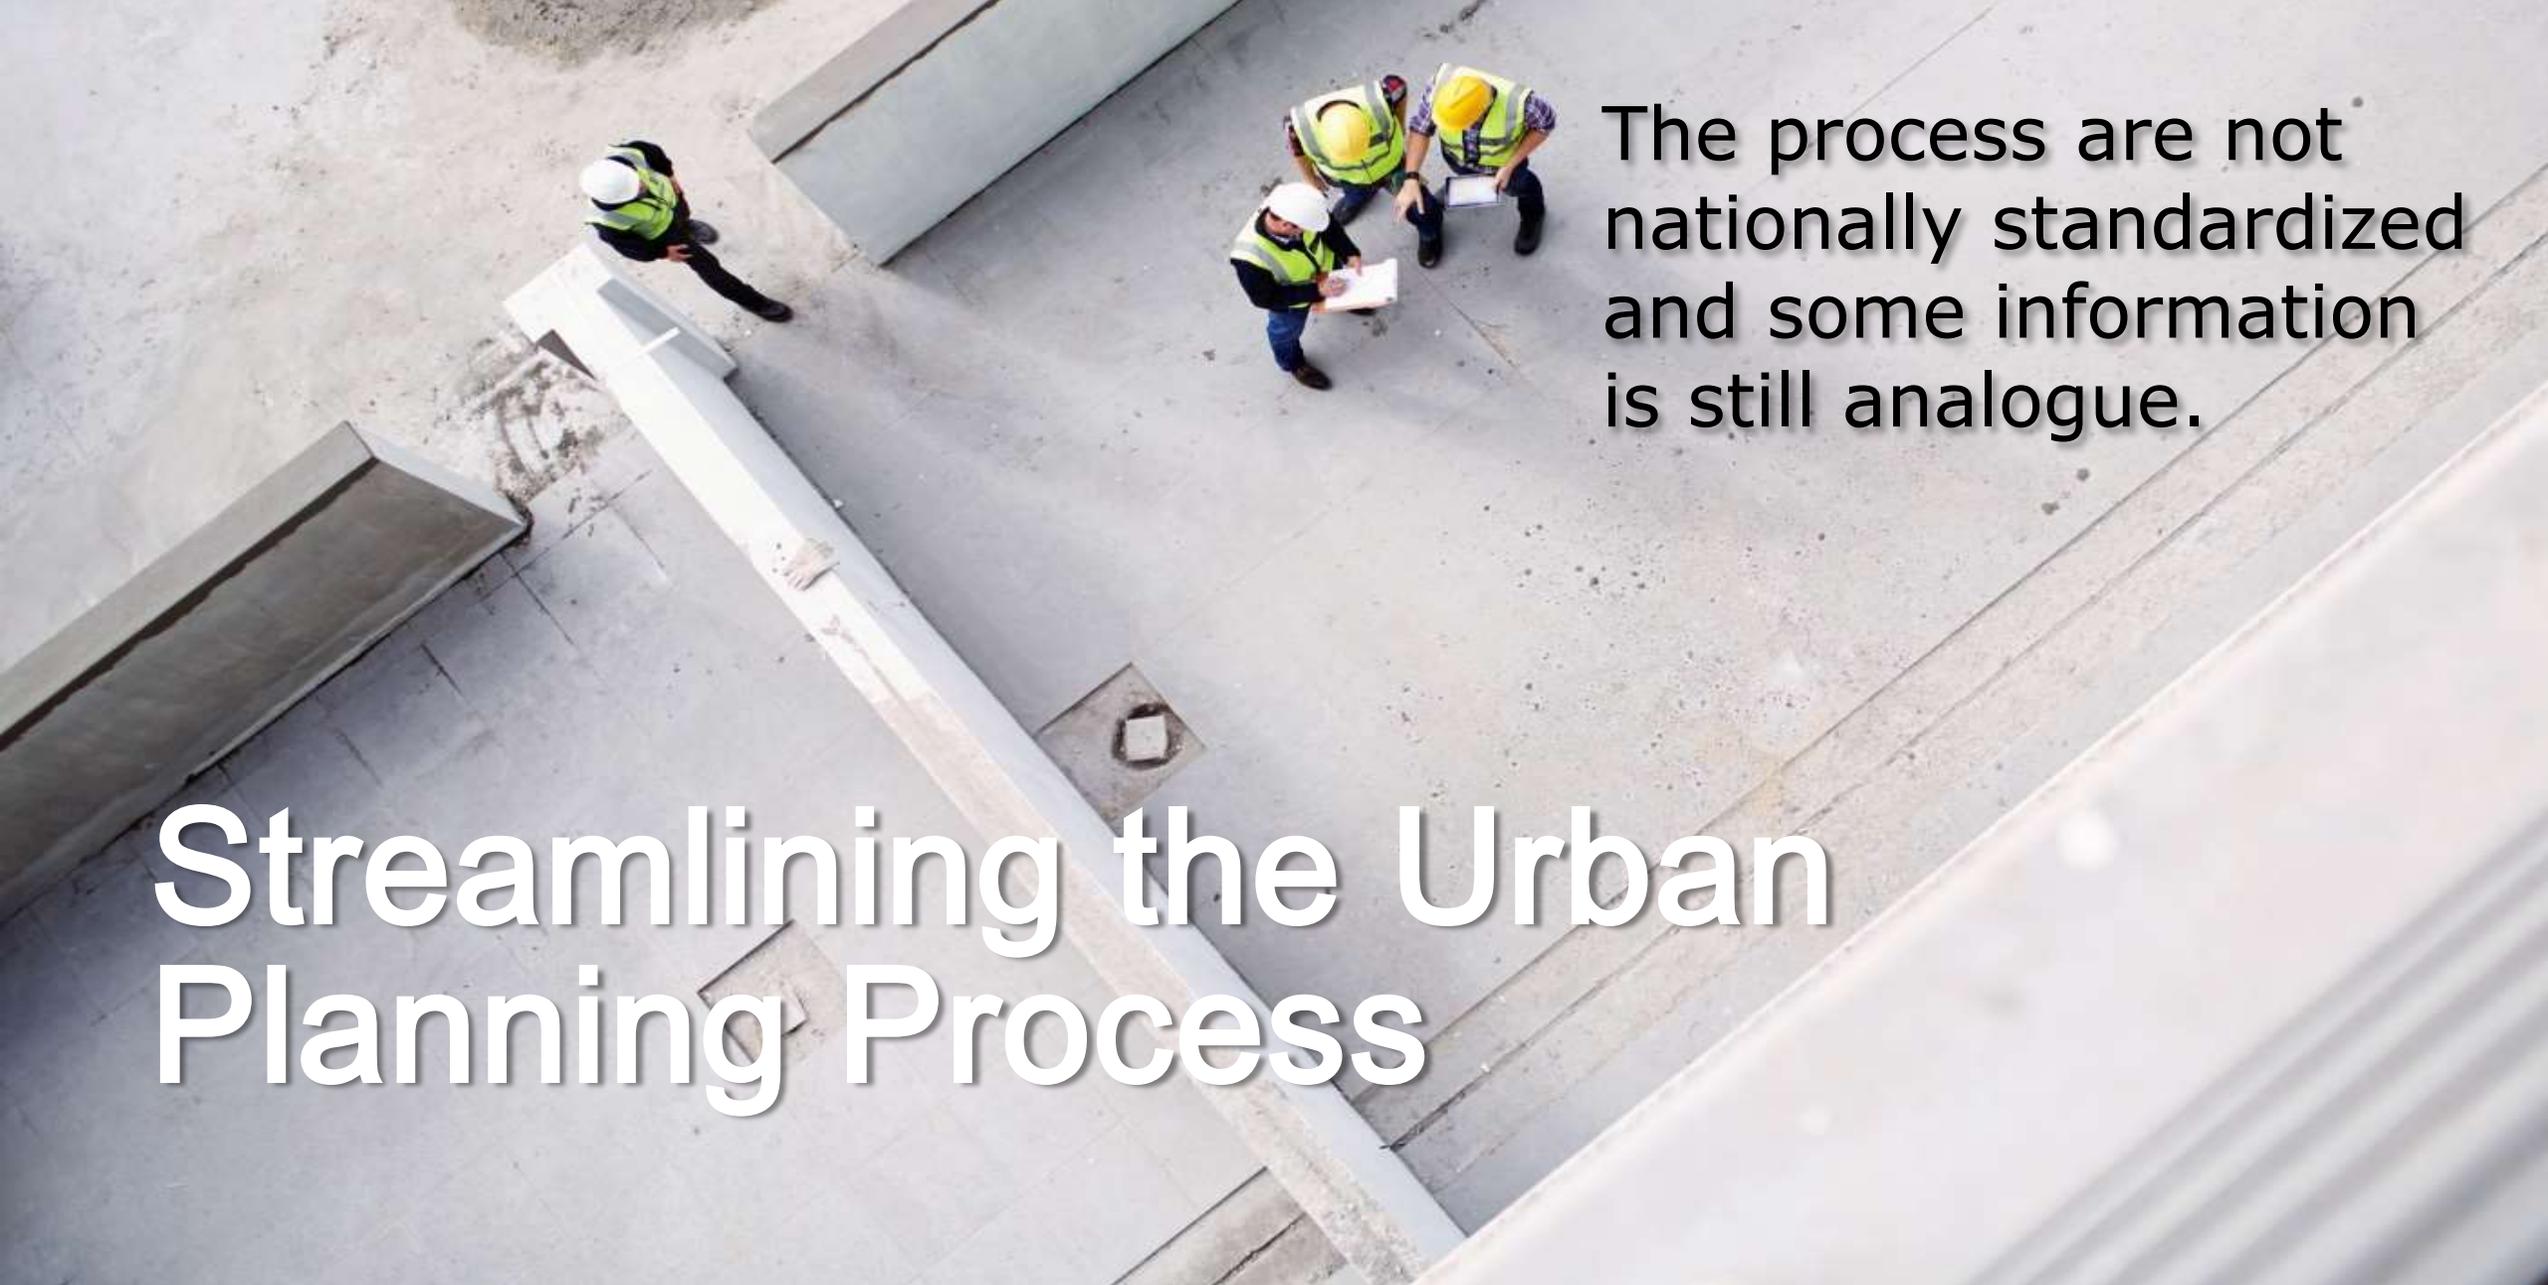

# Innovation and Growth

User financing is an  
obstacle for data  
driven innovation

Public sector  
geodata are  
not nationally  
standardized

# Digitization of Public Sector Administration

The process are not nationally standardized and some information is still analogue.

# Streamlining the Urban Planning Process

# Climate adaptation and environmental threats

The availability of geodata relevant to climate change is still insufficient

All emergency services  
are not using uniform,  
up-to-date maps

# Defense and civil contingencies

# Goals for 2016-2020

---

1

Geodata  
are open

2

Geodata  
are  
usable

3

Geodata  
are available

4

Collaboration is  
well-developed

# Goals for 2016-2020

---

1

Geodata  
are open

2

Geodata  
are  
usable

3

Geodata  
are available

4

Collaboration is  
well-developed

# Goals for 2016-2020

---

1

Geodata  
are open

2

Geodata  
are  
usable

3

Geodata  
are available

4

Collaboration is  
well-developed

# Goals for 2016-2020

---

1

Geodata  
are open

2

Geodata  
are  
usable

3

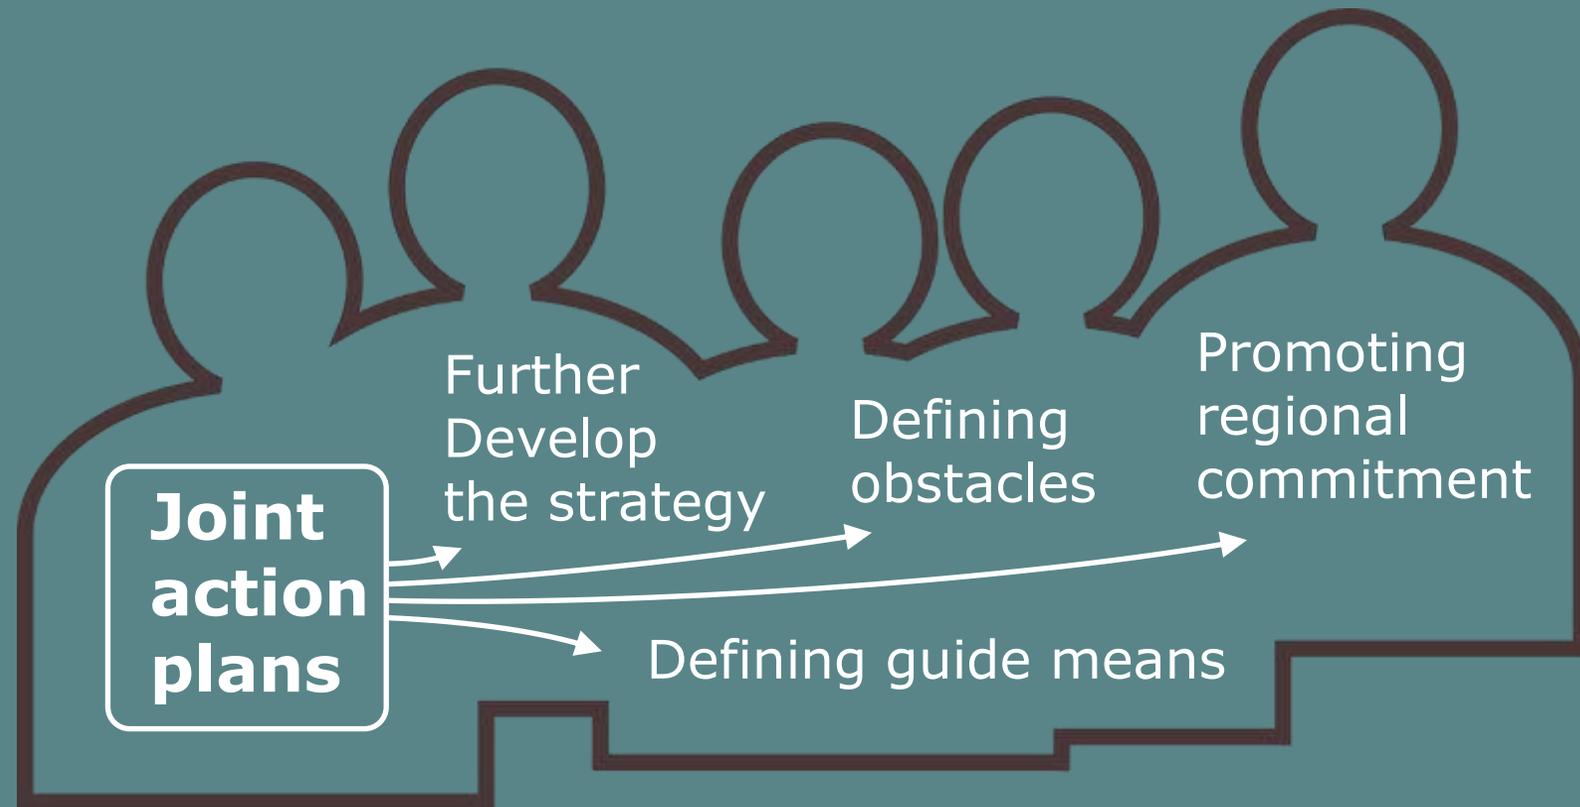

Geodata  
are available

4

Collaboration is  
well-developed

# 4

## The strategy forms a base for an ongoing collaboration in defining the future

# Reasons for the strategy success

- ❑ An external focus on important societal challenges
- ❑ A National Geodata Council with committed individuals
- ❑ A compact and not overworked strategy
- ❑ A space and need created for continuous collaboration around the strategy handled in joint annual action plans

Thanks for your attention!
