## Automating National Mapping & Cadastre with GeoAI

Nick Land, Esri Inc

ORGANISED BY

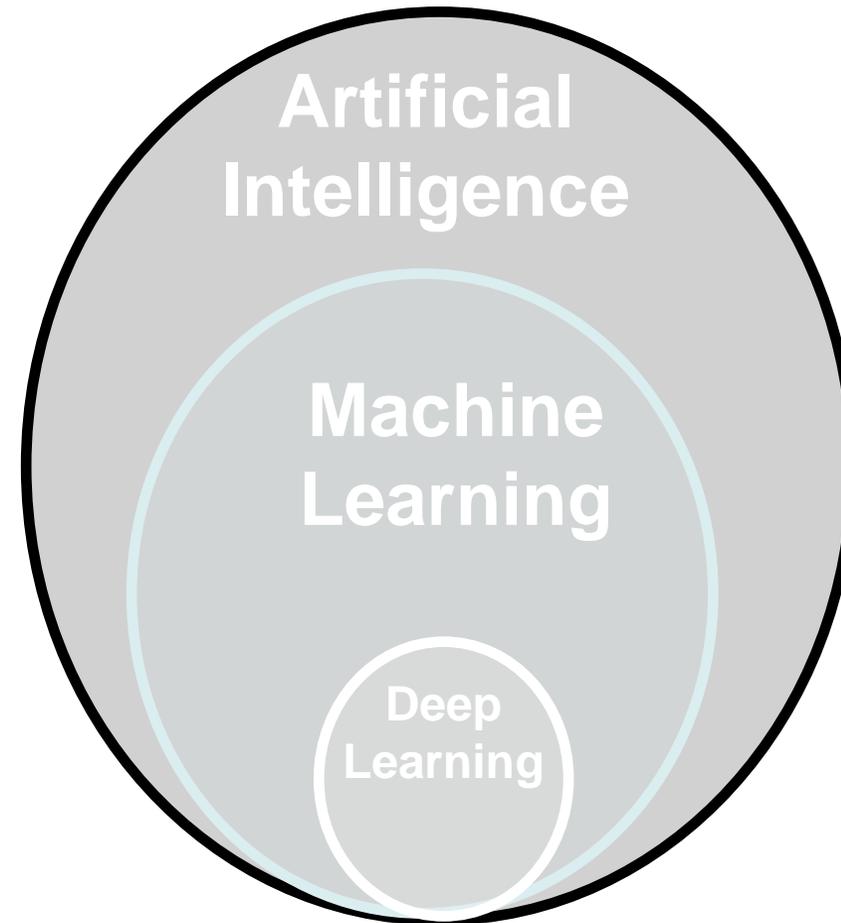

PLATINUM SPONSORS

## AI – Hype or “State of the Art”?

- Advances in AI
- Compute power (cloud)
- Availability of big (labelled) data
- Accessible
- Relevant
- Automation of workflows

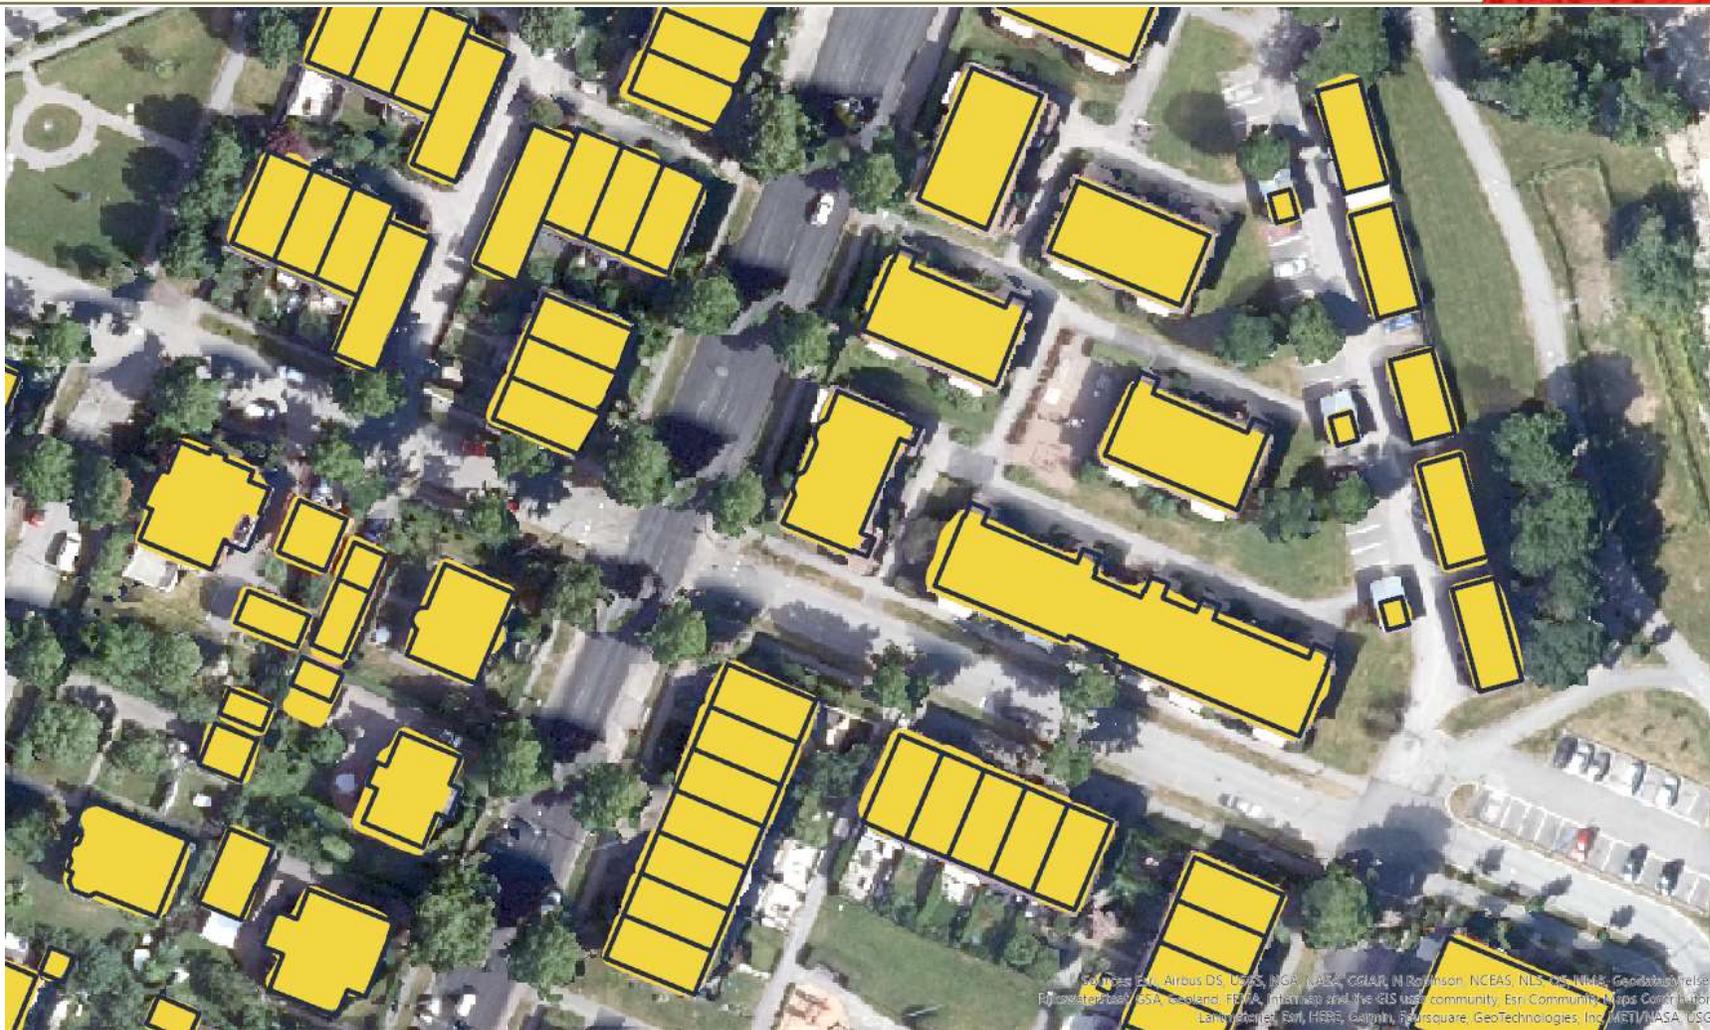

## Use Case – Base Map Update

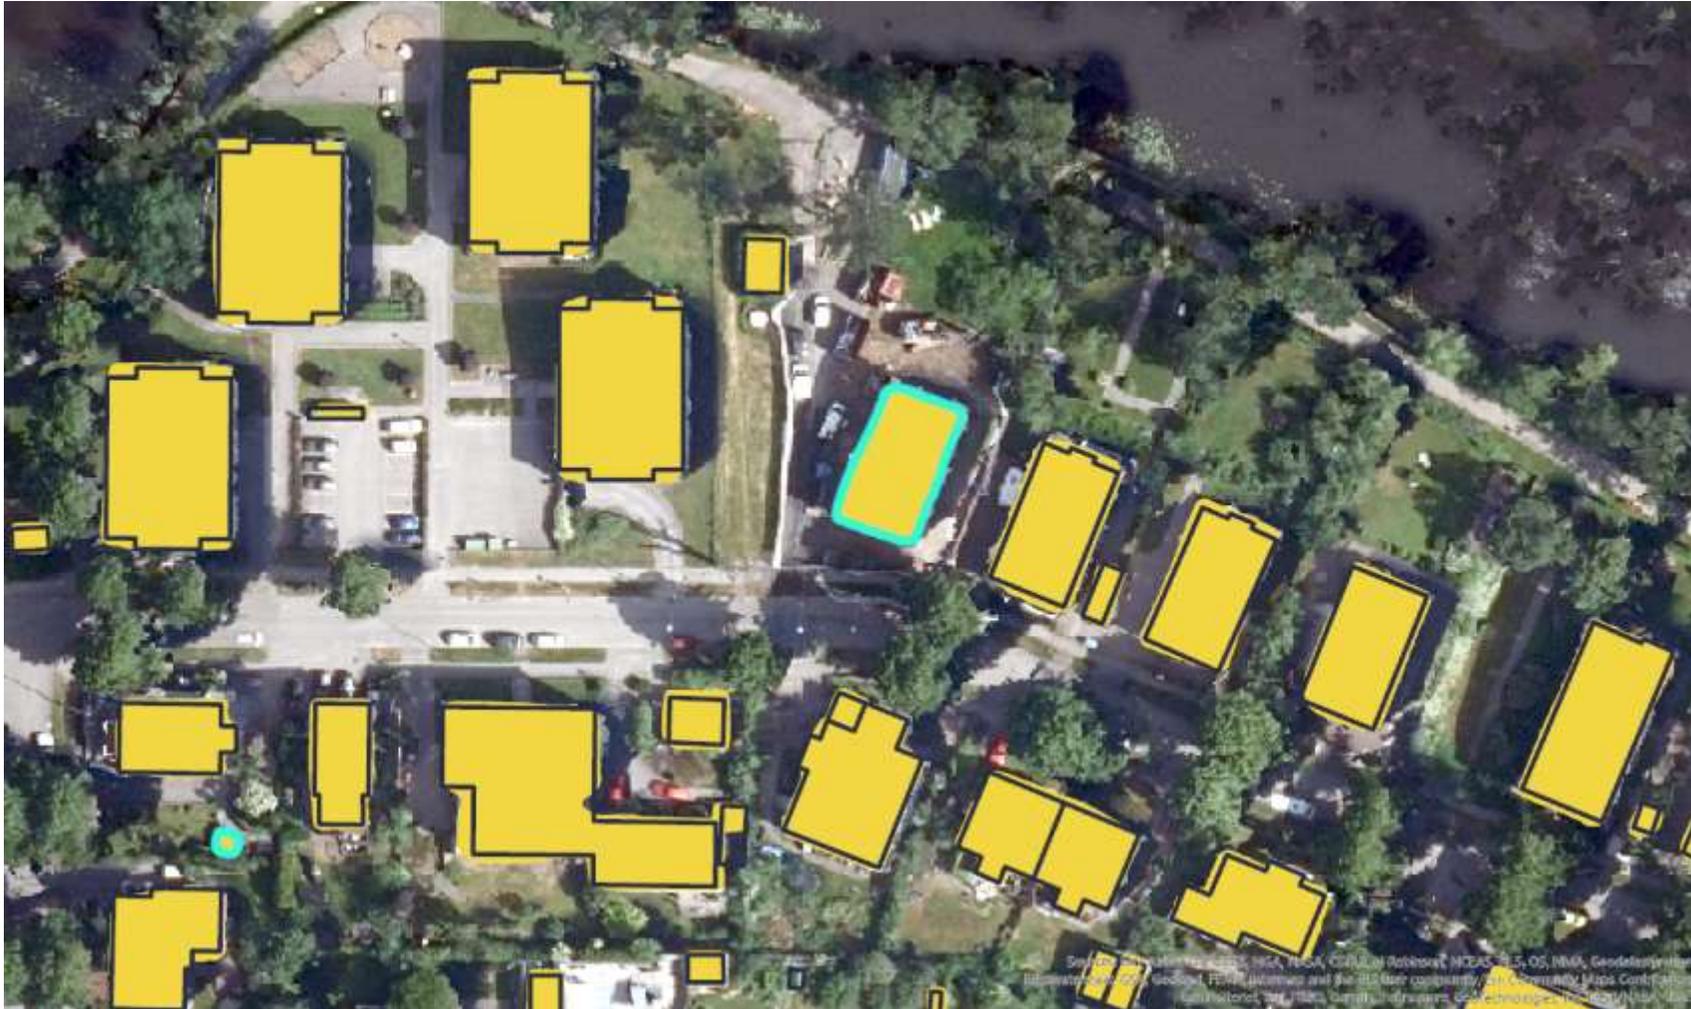

Buildings Layer

DL Buildings

Existing Building Footprints

DL Detected Buildings\*

Green = Existing

\*Red & Orange = New

## Use Case – Cadastre Update

- Buildings detected, 90%+ identified
- Less than 5% false positives
- DLS evaluating results

## Use Case - Taxation

### Undeclared pools in France uncovered by AI technology

© 29 August

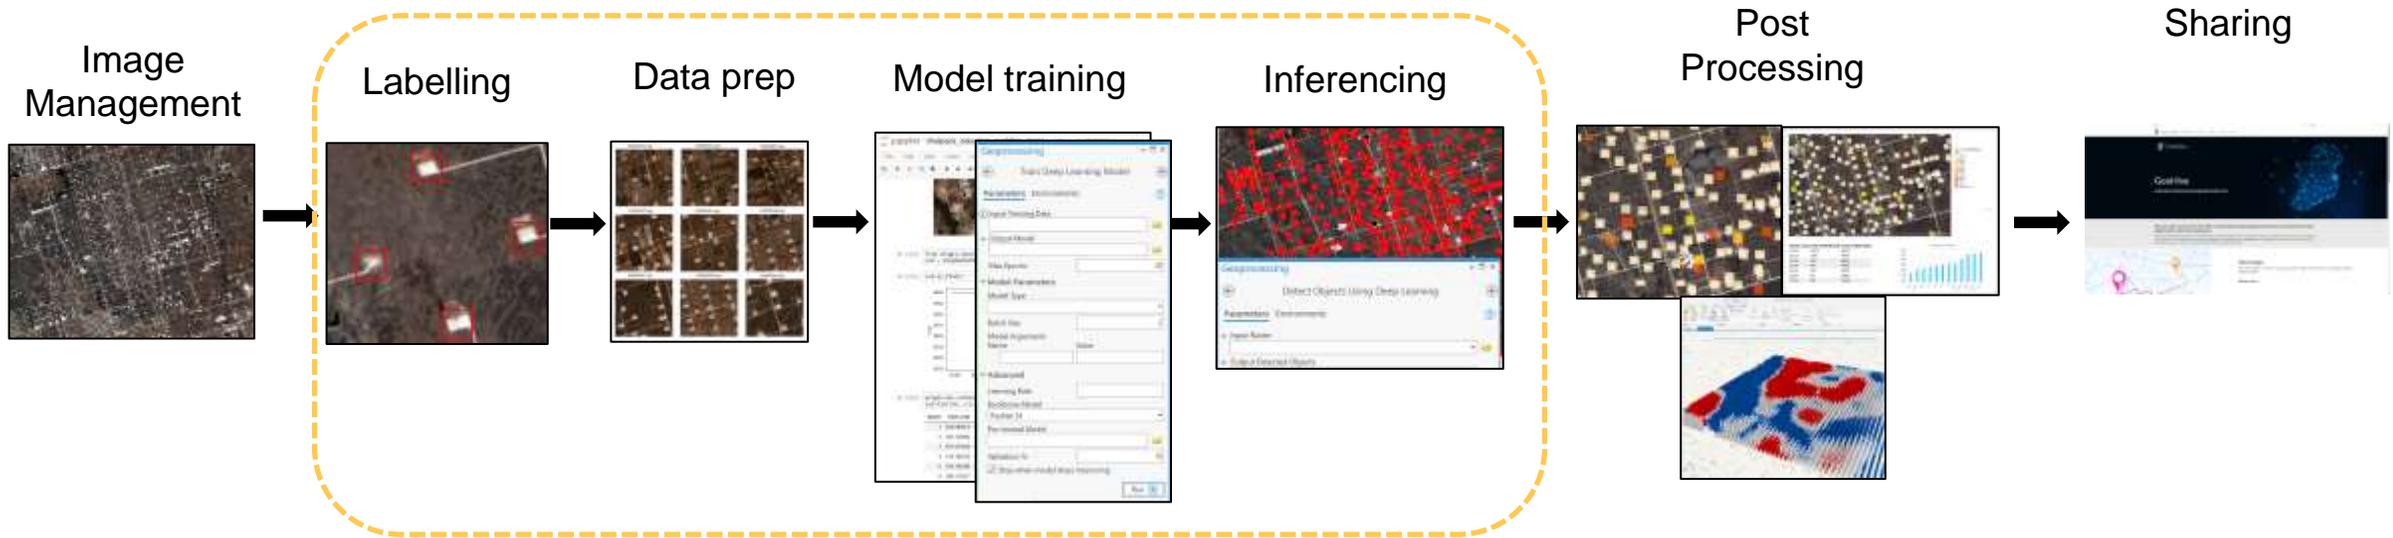

GETTY IMAGES

The discovery of thousands of undeclared private swimming pools in France has provided an unexpected windfall for French tax authorities.

Following an experiment using artificial intelligence (AI), more than 20,000 hidden pools were discovered.

They have amassed some €10m (£8.5m) in revenue, French media is reporting.

## Deep Learning Workflow

### For Wide Range of Data Types

- Aerial
- Satellite
- Radar
- Lidar
- Motion imagery
- Bathymetry
- Point cloud
- Drone

### Implementing Many Tasks

- Object classification
- Object detection
- Pixel classification
- Image translation
- Object tracking
- Scanned maps

### Integration with DL Libraries

## Deep Learning Workflow with Pre-trained Models

Eliminates:

- Imagery requirements for model training
- Labelling requirements
- Training AI models
- Massive compute requirements

Building Footprint Extraction - USA

Parcel Extraction - USA

Land Cover Classification (Landsat 8)

Road Extraction - Global

Pool Detection - USA

Deep Learning Package By esri\_analytics  
Deep learning model to detect swimming pools in high-resolution aerial or satellite imagery.

Authoritative

## In Conclusion

- GeoAI benefits Topographic Mapping; Cadastre; Taxation
  - Change Detection; Creation; Update
- Iterative, incremental approach – use case dependent: What’s “good enough”?
- Training data is key
- GeoAI is one tool in the GIS toolbox
