

**Intergraph Mapping and Geospatial Solutions presents:**  
An Intergraph vision, technology and implementation seminar

Join Intergraph Mapping and Geospatial Solutions for an exciting one-day pre-conference seminar focusing on the increasingly crucial role Spatial Data Infrastructures (SDI), Land Information Management (LIM), and Spatial Data Management play in relevant geo-industries and the wider surveying and GI community. The seminar, entitled Evolution of Standards Today – a Solid Foundation for Information Management Tomorrow, will take place April 17, 2005, in Cairo, Egypt, preceding FIG Working Week 2005 and GSDI-8.

The seminar will include a keynote highlighting Intergraph's SDI vision as well as presentations outlining the importance of Web Services-oriented systems and solutions in SDI implementation as well as their increasing impact on more classical fields such as LIM and Spatial Data Management. The seminar provides you with an opportunity to take advantage of

- Case studies of real-life Web Services implementations for SDI and LIM
- Technical updates to keep you on the cutting edge
- Real-time demonstrations
- Great opportunities for discussion and question and answer sessions with industry experts – ensuring you get the most out of the seminar

Find out how Intergraph is advancing the evolution of technologies that empower SDI and LIM systems among organizations worldwide. ## **Seminar Agenda**

An Intergraph vision, technology and implementation seminar

April 17, 2005

- 8:00            **Registration**
- 9:00            Opening
- 9:10            Intergraph Spatial Database Infrastructures Vision (keynote)
- 10:00          Web Services-oriented Systems
- 10:30          **Break**
- 11:00          Land Information Management Case Studies
- 12:00          Spatial Data Infrastructures/Web Services Case Studies
- 12:30          **Lunch break**
- 14:00          Product overview and update
- 14:30          Land Information Management Solutions Technical Update
- 15:30          Spatial Data Infrastructure Portals/Web Services in Action
- 16:15          Lessons Learned/Q&A
- 16:30          **Adjourn**
